

Accumulator™

The Vaniman Accumulator™ Pre-Filter is designed to protect and collect. It protects workers and equipment from the damage caused by dust. It collects dust, valuable gold, and aluminum oxide before it reaches the dust collector.

Accumulator™ VMC-A300

AccumulatorXL™ 10509

Air, dust particles and debris enter the swirling vortex inside the Accumulator™

Cleansed air flows up as dust particles are separated out and fall to the bottom.

Air flows up from the Accumulator™. This air is now 95% free from dust particles. The air will now go into the filtering system of the dust collector.

Dust particles and debris are collected in the Accumulator bowl, which is easily detached and emptied.
