ECE Series exchange cart

- **Versatile** - We offer exchange carts with various shelving configurations, caster styles, accessory packages, and in various sizes to meet all requirements for supply exchange in any healthcare environment.
- **Adaptable** - exchange carts can be readily altered to meet changes in use for supply, volume and packaging requirements; by adding or removing accessories a multitude of combinations can be made to customize an exchange cart for a specific use.
- **Assembly** - numerically calibrated grooved posts, tapered high-temperature-resistant plastic split sleeves and shelf collars combine to make shelving assembly a simple two-step exercise: 1) Snap the split sleeves onto the posts at the location of your choice; 2) Slide the shelf collars over the split sleeves. A positive lock between the shelf and the split sleeves is created without the use of any tools, becoming stronger as additional weight is added to the shelving.
- **Open-wire construction** - promotes higher visibility by allowing light to pass through the shelves, permits greater air circulation which helps reduce dust and contamination build up, and increases the effectiveness of fire-suppression systems.
- **Posts** - posts are numbered on vertical one-inch increments to help ensure fast and level assembly; shelving can be adjusted up and down every inch for optimum cart configuration.
- **Finish** - all components are chrome plated.

System Benefits

- **More-accurate inventory control** - inventory of exchange carts can be strictly monitored allowing for quick and efficient control of usage.
- **Reduced costs** - Eagle exchange carts help reduce inventory surpluses by requiring less stock than traditional par level systems.
- **Improved handling and flexibility** - carts are handled only once between stocking and patient distribution, thus eliminating par level inventory taking and retrieval of needed supplies; changes in patient requirements can be instantly responded to with adjustments in type and quantity of supplies.
