LISTA
MAKING WORKSPACE WORK®

To operate at peak efficiency, motor vehicle and equipment service, repair and parts departments must incorporate the most effective storage and workspace systems.

At Lista, we create storage and workspace systems that allow you to meet your goals:

- increasing profitability
- improving customer satisfaction

You can accomplish these goals by investing in storage and workspace solutions that:

- promote faster access and efficient service
- maximize available space
- improve inventory management
- enhance employee productivity
- create an aesthetically pleasing, professional image

Maximize workspace. Lista's high density storage systems maximize usable workspace while providing improved organization for fast order picking and inventory taking. The right Lista storage system can turn a jam-packed, disorganized area into a clean, smooth-running workspace with needed parts, tools and equipment always close at hand.

Benefits that last. The benefits of Lista don't end there. Our storage and workspace systems have been constructed to accommodate years of heavy-duty use. They feature lockable drawers for safe, protected storage of expensive tools and inventory. They are ergonomically designed. And their sleek, attractive design not only improves efficiency but impresses customers by enhancing your company's professional, quality image.

When the main issue is greater efficiency. Counter height Lista cabinets with butcher block or steel tops create an organized, highly efficient, smooth running issue counter in any parts department. Modular drawer and shelf cabinets provide clean, safe storage for a diverse array of fast-moving parts such as oil filters, nuts, bolts and air filters, and allow for the easy and fast retrieval of these items. And with Lista's recessed drawer handles, nothing protrudes from the cabinet housing.

"Lista cabinets are far superior to anything else we've used. Their construction and ease of use beat every other brand we've tried. We particularly appreciate the greater accessibility of their wider, shallower drawers."

Vin Pellegrino
Parts Manager, Lincoln Mercury
Rodman Ford

PARTS STORAGE

Efficient storage is within easy reach.

Lista's high density modular cabinets meet all your storage needs while taking up 40% less space than conventional shelving. The cabinets' full extension drawers store all items within any worker's easy reach, reducing strain. Partitioning configurations in the drawers allow custom compartments for all your small and medium-sized parts.

"It's mind-boggling how much we can store in our Lista cabinets. Plus, we've cut inventory time in half."

Robert Crete
Parts Operation Director
Boston Volvo Village

The benefits are stacking up. With the Lista drawer/shelf cabinet combination or the Lista Storage Wall® system, not an inch of storage space is ever wasted. These unique systems combine drawers and/or shelves to provide custom solutions that exactly match the size of the items you're storing. The biggest and smallest of items can be stored together in a logical and accessible manner. The 400-lb. weight capacity of Lista drawers and roll-out trays enables you to store even the heaviest items within easy reach.

"Lista cabinets, Storage Wall systems and computer cabinets have vastly increased our storage capacity, while giving us the clean, smart appearance that customers expect at our dealership."

Paul Ferreira, Parts Manager

The ideal workspace solution for any space. At Lista, our modular approach lets us create workbenches that exactly suit your needs. Below the worksurface, you can choose from a wide array of cabinet pedestal widths and heights. Other storage options include roll-out trays and shelves behind either hinged or sliding doors. You can also build up from the work-surface with a choice of riser shelves and accessory options, and choose from a variety of workbench tops. Lista workbenches are ideal for technician, assembly and tear down applications.

"We love how functional, organized and good-looking our Lista benches are. We sell our shop as an important part of our service experience, and the Lista benches really impress our customers and contribute to our professional appearance."

Larry Bedell
Service Manager
Porsche/Audi of Nashua

The solution for tool storage on the go.

When you need storage plus mobility, Lista mobile cabinets provide safe and secure storage and transport for your parts and tools. For vehicle maintenance and repair applications, nothing compares with the flexibility, durability, security and functionality of our mobile cabinets. All Lista drawer storage cabinets can be adapted for mobile applications.

Special storage for special tools.

Special tools demand the secure, flexible, organized storage that only Lista can offer. Lista's seven footprint sizes and eleven drawer heights, combined with Lista shelf storage, enable you to store even the largest tools and kits in one convenient location.

"With the Lista system, my mechanics can do work right on top of the cabinet, then reach into the drawers below for the tools they need. Everything is within easy reach."

Richard Pilavin
Owner
Precision Harley-Davidson

Free design services. Lista's engineering and design team is ready to provide you with a detailed plan for your individual workspace and storage needs.

Products to meet every type of need. There are many other Lista solutions that are well-suited for service/repair and parts departments. Unique products include the Control Station, overhead cabinets, computer cabinets for diagnostic equipment and electronic manuals, and storage cabinets in a wide array of heights, footprints and configurations.

Lista offers solutions designed for efficiency and future flexibility. We provide systematic solutions for a whole range of needs, from the storage of small tools to complete space-efficient, productive work environments. Let us show you how our years of experience in motor vehicle, equipment service and parts departments will prove profitable to you.
