## PNEUMATIC SNAP RING TOOL SR-100

### TIP OPENING ADJUSTMENT PROCEDURE

Locate the Allen head cap screw at the rear of the power pack and follow the instructions below:

		
Locate the 1/8" Allen head cap screw on the rear end of the power pack and remove it.	Using a 3/32" Allen wrench, remove the internal retaining set screw.	To adjust the tip spacing, use a 3/32" Allen wrench. Turn clockwise to close the tip spacing further or counter-clockwise to spread the tip spacing.

Once the tip spacing has been adjusted to match your specific snap ring, reinstall the retaining set screw and cap screw so lock in the tip spacing.
